Tackling AMR Theme 2: Accelerating therapeutic and diagnostics development - Collaborative grant Outline Proposals

Guidance for preparing case for support
(maximum 5 pages)

In your case for support please address each of the following headings using the description under each heading as guidance. The case for support may be up to five A4 pages in length, including references, using Arial 11pt typeface with margins of 2cms on all sides. The Case for Support must not exceed 10MB.

1. Title of the proposal

2. Importance of the research
   - Identify the aims and objectives of the research and explain how the proposed research fits with the focus and strategic objectives of this call.
   - Explain the need for the research and the rationale for the particular lines of research you plan to pursue. Describe the potential impact of the research.
   - Demonstrate knowledge and understanding of past and current research in the area.
   - Justify how your research will add value to AMR in the short, medium, and long term.

3. Research team and environment
   - Explain how the applicants and collaborators are well qualified to carry out the proposed research.
   - Describe the multi-disciplinarity and novelty of the research collaboration and how the applicants will work together.
   - Describe how the breadth of activities will be coordinated including the management structure and organisation of resources.
   - Describe the research environment in which this study will take place.
   - Outline any partnerships with external bodies including industry.

4. Research methodology and design
   - Describe the study design and experimental approach(s) and techniques that will be used.
• Detail the methodology to be used and justify this choice. Highlight if you are developing new research methods or using innovative methodology.
• Identify any facilities and resources you will need to access, giving sufficient detail to justify any resources requested.
• Describe the programme of work proposed including details of how the research will be organised over the duration of the award.
• Give a timetabled plan (Gantt chart) of proposed activities and suggested milestones.

5. Ethics and research governance
• Describe briefly any ethical issues arising from this proposal. Please give details of how any specific risks to human participants will be controlled, and of any new animal research.
• Describe the ethical review and research governance arrangements that would apply to the work done.

6. Exploitation and dissemination
• Is the proposed research likely to generate commercially exploitable results?
• What arrangements and experience does the research group or the host research organisation have to take forward the commercial exploitation of research in this area?
• Other than publication in peer reviewed journals, indicate how any results arising from the research will be disseminated so as to promote or facilitate take up by users.
