

## Section 3

# New and emerging areas

Research methods, technologies and tools move forward rapidly and the MRC recognises that additional guidance may be helpful to those working in new and emerging fields, and in areas which are developing quickly. This document will be reviewed regularly, but given the pace of change this guidance should be considered as a working document which will be updated as necessary. Please contact the MRC at [corporate@headoffice.mrc.ac.uk](mailto:corporate@headoffice.mrc.ac.uk) to suggest areas where new or revised guidance might be helpful.
