CONFAP and MRC Health System Research Networks

Workshop

Physiotherapy Graduation at University of Sergipe

Research interests

Asst. Prof. Ana Silvia Moccellin
Objective: to strength the health care network in Aracaju city (Sergipe, Brazil) and neighbouring cities, mainly on Primary Care
Academic League of Physiotherapy in Primary Health Care (LAIFIAPS – UFS)

**Approach with Health Public Research**
- To stimulate the development of projects that may contribute to the scientific growth of the area

**Contact with Primary Health Care users**
- To enable the student to work with families and communities

**Primary Health Care**
- To understand the services structure and the work processes developed in them
Objectives of Academic Education

To recognize key issues in current public health

To analyze the demographic and epidemiological profile of the population

To identify and use available social resources, articulating and promoting integrated actions to other sectors of society

To carry out actions and practices of health promotion and disease prevention based on the health needs of users

To organize the local health service, stimulating social control from the integral care perspective
Research Interests

**Strengths**
- Students insertion in the three levels of health care;
- Encouragement to the organization and management of the team work process.

**Weaknesses**
- Absence of health actions planning;
- Difficulty of integration between NASF and health team.

**Opportunities**
- Suppressed demand due to the low supply of Physiotherapy services;
- Communication with municipal management sectors

**Threats**
- Scarce actions of permanent education;
- Difficulty in understanding the role of the NASF professional

**Professionals of Nucleus of Support for the Family Health - NASF**
- Nutritionist
- Occupational Therapist
- Pharmaceutical
- Physical educator
- Physiotherapist
- Psychologist
- Speech therapist
